TheraTears® is clinically proven to **reduce the signs and symptoms** of dry eyes<sup>1</sup>

### TheraTears® Dry Eye Therapy Lubricant Eye Drops with Osmo-Correction®

- Reduced patient symptoms (OSDI) up to 33%
- Restored tears to normal osmolarity levels within one week

A Drop Like  
No Other™

# TheraTears® was shown to provide homeostasis, reduce tear osmolarity and improve patient symptoms

## OBJECTIVE:

To evaluate the effects of a hypotonic ocular lubricant, TheraTears® Dry Eye Therapy Lubricant Eye Drops, on tear osmolarity and ocular surface symptoms in hyperosmolar, symptomatic dry eye subjects.

## METHODS:

- Prospective, open-label, controlled clinical trial
- 36 eyes of 18 dry eye subjects at a single clinical site
- Participants used TheraTears® Lubricant Eye Drops QID OU for 8 weeks

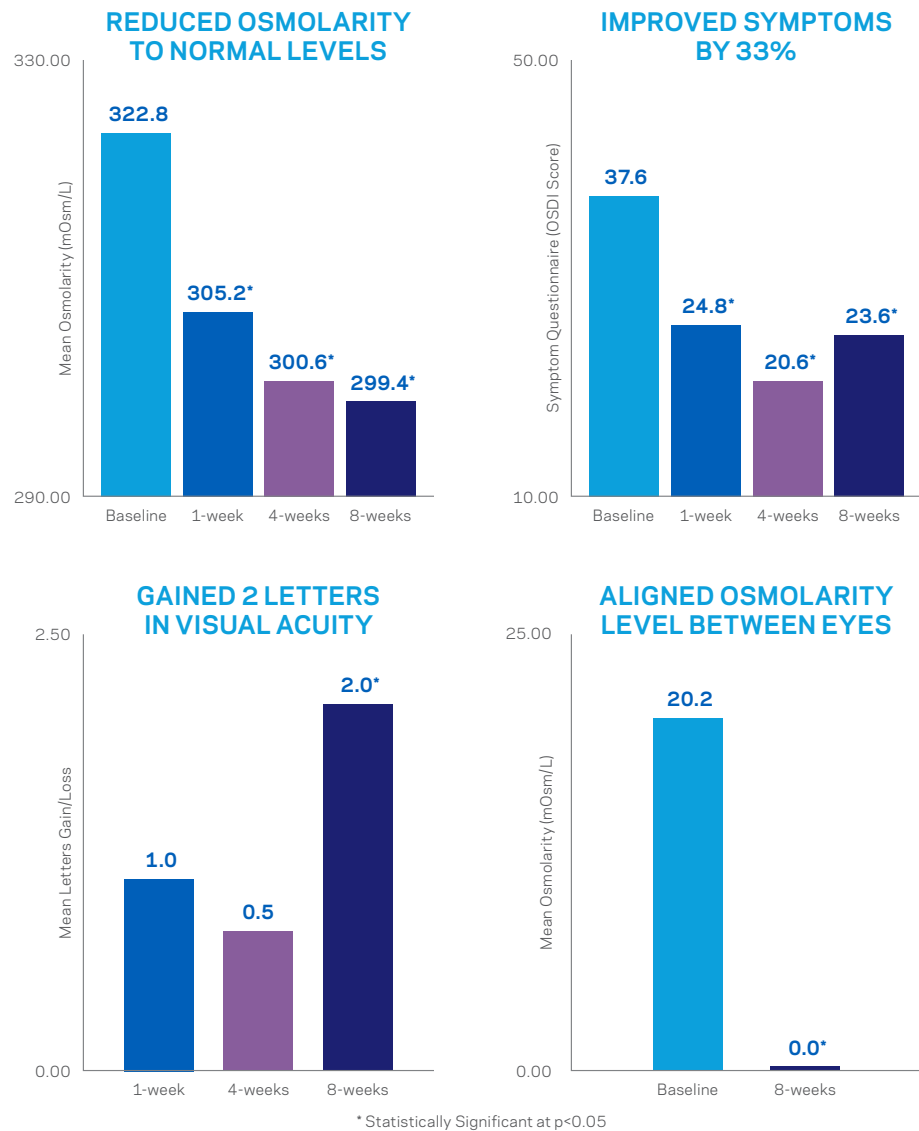

## CLINICAL MEASURES:

- Tear osmolarity (TearLab)
- Symptom questionnaire
- Visual acuity

## INCLUSION CRITERIA:

- 72-hour washout: Baseline osmolarity  $\geq 316$  mOsm/L or inter-eye difference of  $\geq 8$  mOsm/L with at least one eye with osmolarity of  $\geq 308$  mOsm/L
- Diagnosed or self-reported DED
- Treatment for dry eye prior to study entry

## KEY RESULTS

## CONCLUSION:

The consistent use of TheraTears® Dry Eye Therapy Lubricant Eye Drops provided homeostasis, reduced tear osmolarity and improved patient symptoms within as little as one week. Improvement in visual acuity was seen after eight weeks.
